# EPrints 4 / 3.4.0 Key Philosophy

- “Base” EPrints storing and handling of generic data and objects
- “Layers” to handle specific metadata schema, import/export, rendering, search, etc. for specific domains

## 3.4 Releases

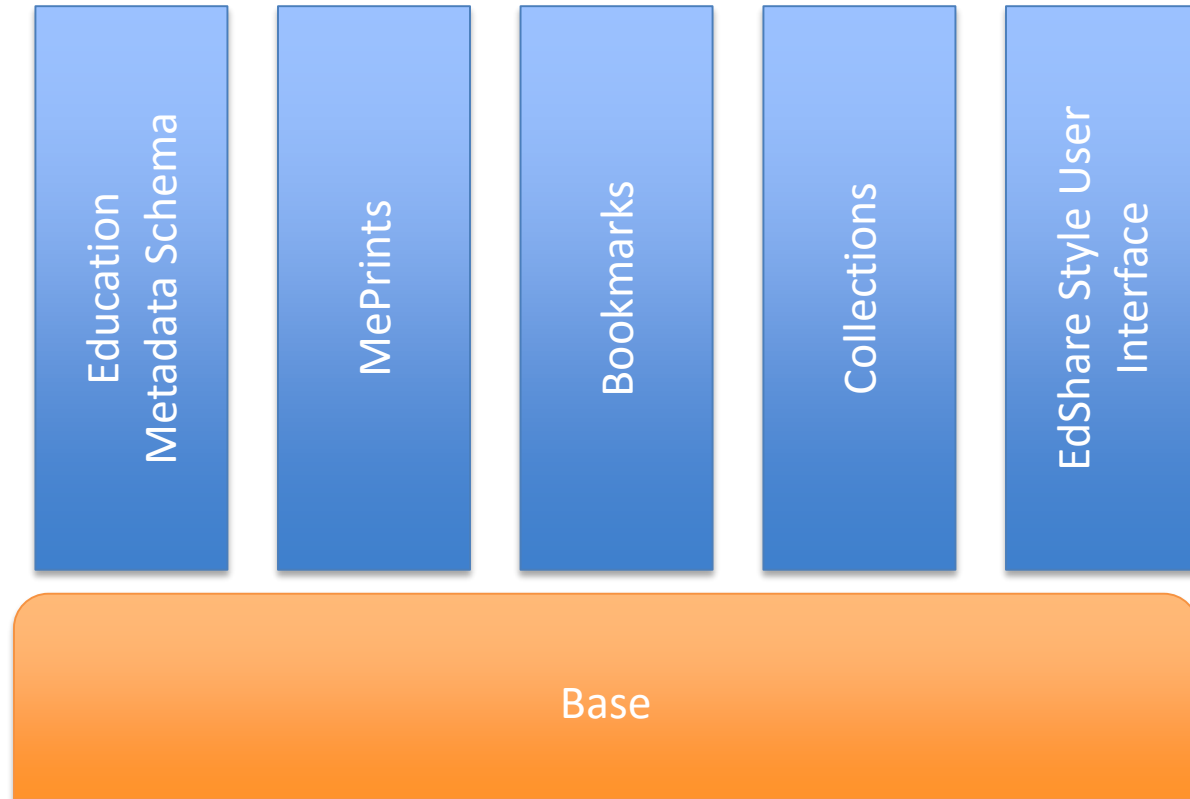

- Collections of metadata schemas, renderers, plugins and packages tested together for a specific purpose (the pizza model)
- Initial Releases for:
  - Open Access Publications
  - Open Education
  - Open Research Data

# EPrints 3.4 for Publications

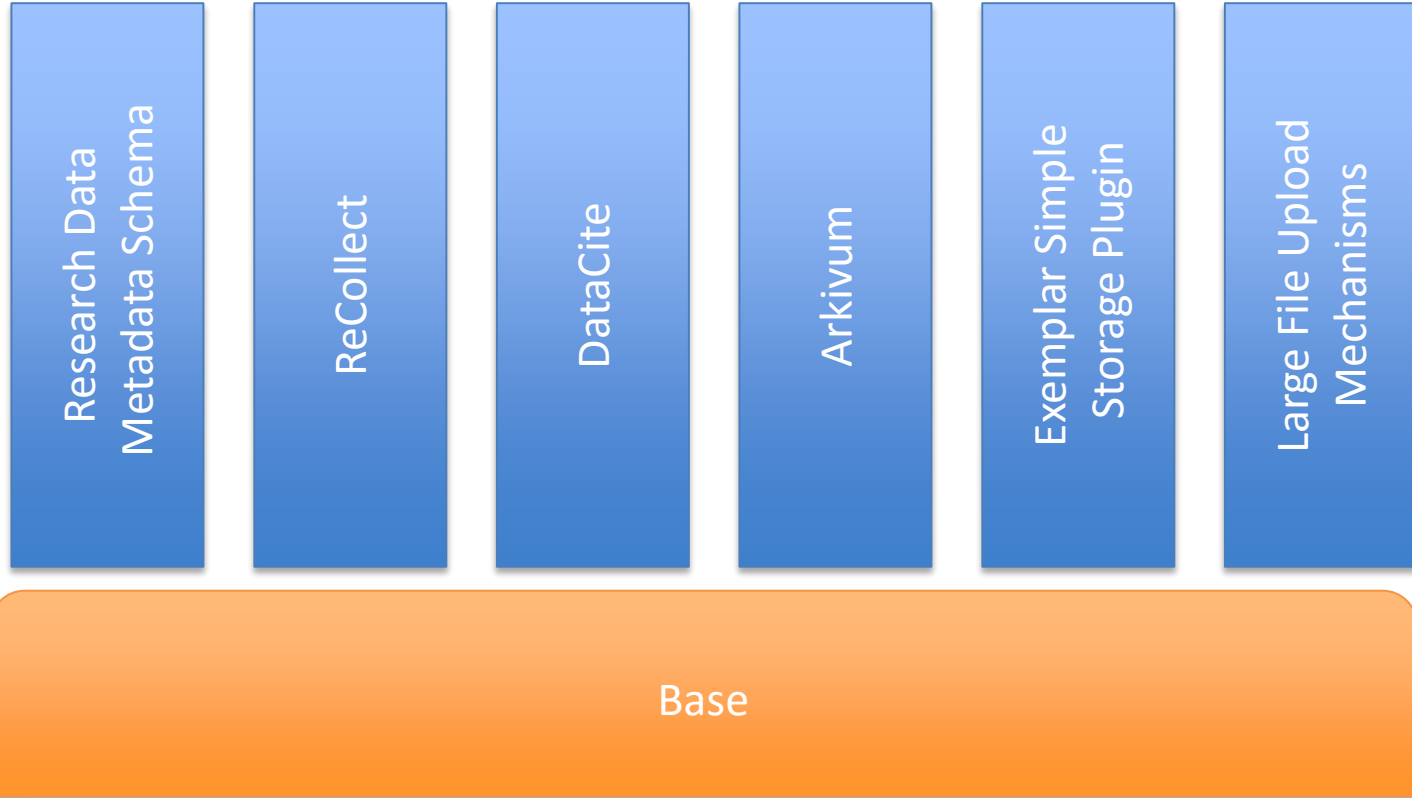

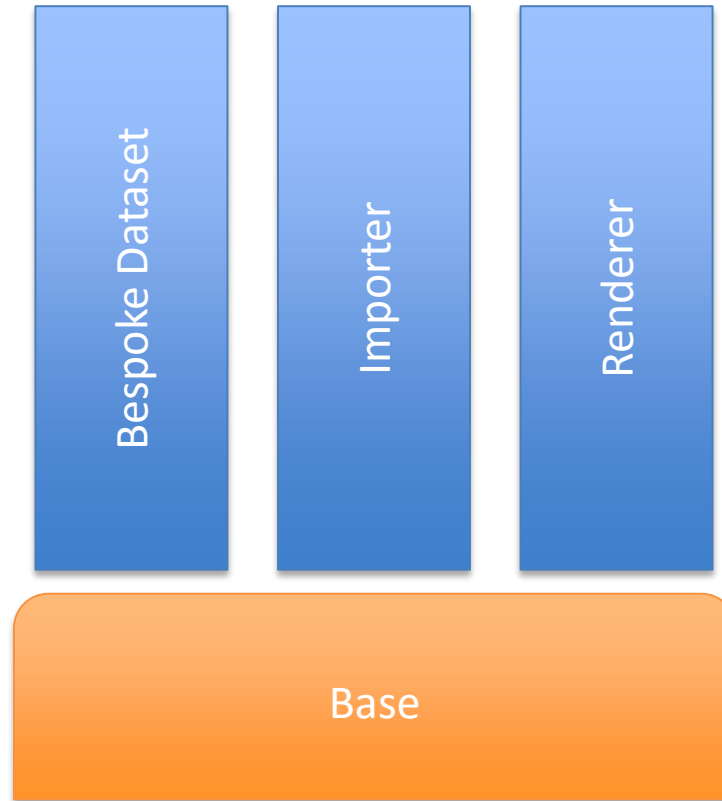

# EPrints 3.4 for Open Education

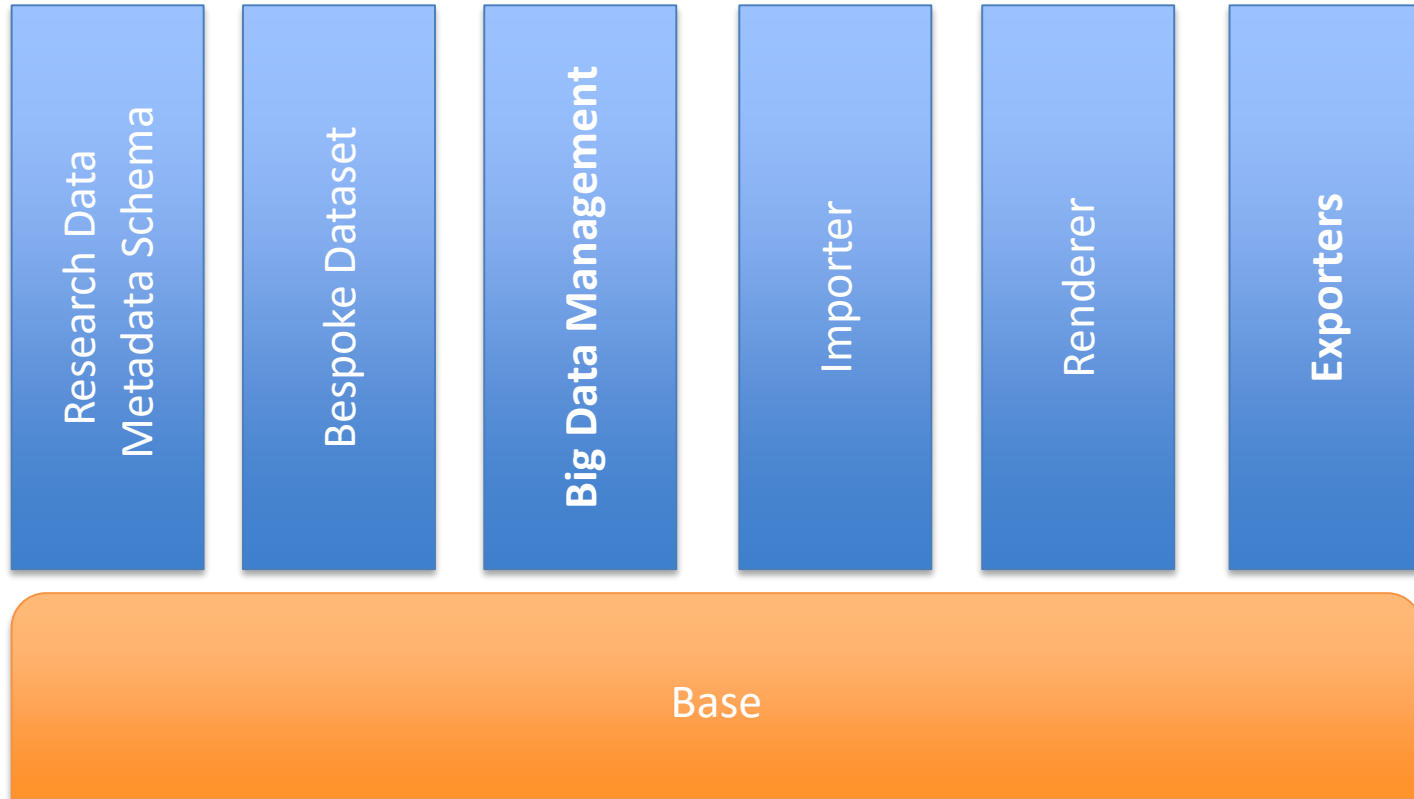

# EPrints 3.4 for Open Research Data

# EPrints for Dataset Showcases

# EPrints for Social Media Data

# Community Activities

# Community Engagement

- New Role in EPrints Services
  - To understand and promote community agendas
  - To support community members
  - To facilitate community contributions
  - Collaborating with other stakeholders
- Recent Activities
  - Supported development \*
  - Training videos \*
  - Wiki Improvements \*
  - EP-tech interaction
  - Nagging for documentation

\* Questions Encouraged (I could talk for hours)
